a) 5 User Stories:

- As a user, I want to see an image and a brief of each Film/TV Show, so that I can decide whether this Film/TV Show meets my preferences or not.

- As a user, I need to Login WITHOUT Facebook (or add more options), so that it gives me more flexibility to use the service.

- As a user, I should be able to edit my profile details so that I can protect my privacy.

- As a user, I want to see what other Films/TV Shows that other users like, so that I get real recommendations.

- As a user, I should be able to message other users have the same preferences/interests, so that I can connect and meet people like me.

b) 5 features:

1- Build the User-related Pages Interfaces
- Landing Page
- Login/Register
- My Account
- All Movies/TV Shows page

- Single Movie/TV Show page contains a brief of the media, with some images, and others' reviews!
- Watch a Media - When clicking on it from the `Single` page - It contains the Video Player.
- Others: Contact, Privacy, Terms of use and FAQs.

2- Create a Dashboard Interface, includes:
- Responsive Tables
- Interactive Charts to measure the Data
- Custom pages that changes the View. For example: Upload new Movie/TV Show.
- When uploading; There should be an option to wrap the uploaded media together (i.e. When uploading a TV Series, all of them should be packed together as a Playlist)
- Build a Subscription system

2- Authentication [Login/Register/Account]
- Custom Email/Password implementation
- Login via third-party APIs like: Google, Facebook, ... etc.
- User can change the Login Information via `My Account` page

3- Video Streaming Service
- Appropriate Hosting to store the uploaded media
- High bandwidth & Good CDN
- HQ Videos
- The Compatibility with different browsers and devices
- Download Videos

I consider [Contus](#) as a good solution for our Video Streaming service

4- Security
- SSL Encryption

5- Copyrights

- Require a license for the video content
